

CLARIOstar® Plus: Fluorescence Monochromator

The CLARIOstar® Plus is a high-throughput fluorescence monochromator designed to meet the demanding needs of modern laboratories. Capable of handling 96, 384, and 1536 well plates, its superior sensitivity and accuracy has established it as the gold standard for monochromators.

The CLARIOstar® Plus is ideal for quantifying DNA and RNA with unparalleled precision and efficiency, ensuring that your laboratory achieves high-quality results quickly and consistently.

KEY FEATURES

- **High-quality Fluorescence:** Delivers exceptional sensitivity and accuracy.
- **Multimode Capabilities:** Supports spectrophotometry, luminescence, and fluorescence detection modes.
- **Traceability:** Data export options to PDF, LIMS, Excel, CSV.
- **Audit Trail:** Compliant with CFR21 Part 11, ensuring data integrity and compliance.

BENEFITS

- **Time Saving:** Automates processes to significantly reduce manual effort.
- **Reagent Conserving:** Uses low volumes, maximizing efficiency and cost-effectiveness.
- **Automated Results:** Delivers fast, accurate, and reproducible results with minimal intervention.
- **Pre-programmed for PicoGreen:** Simplifies DNA and RNA quantification workflows.
- **Universal Plate Compatibility:** Accepts standard black plates, enhancing versatility.
