

Our wide range of specialised equipment for quality control testing of wine makes routine analysis fast and easy. With portable and benchtop solutions available, We have solutions for your harvest season requirements.

AUTOMATIC TITRATOR

The Steroglass FLASH 2 Titrators are the ideal solution for **Acidity** and **SO₂** testing of wines. With preprogrammed methods, measurements are fast and accurate.

TARTARIC STABILITY ANALYSER

Determine the **Tartaric and Calcium Stability** of wines with the EasyCheck Analyser. Measurements are faster with a higher accuracy compared to traditional methods of stability testing.

AUTOMATIC REFRACTOMETERS

Our wide range of Rudolph Research Analytical automatic refractometers, designed for quality control environments, guarantee fast, automatic, and accurate Brix readings of samples.

HANDHELD REFRACTOMETERS

Our portable refractometers are ideal for fast and accurate measurements during peak season. Both analogue and digital versions are available.

PRE-HARVEST **SERVICING**

It is essential that laboratory equipment is serviced before the harvest season to ensure your instruments are fully functional and ready for use. Lasec® has a large team of qualified and experienced engineers who can assist with the following services to prepare you for the busy season:

Full service packages

Preventative maintenance solutions

Instrument repairs

LABORATORY CONSUMABLES

We stock a comprehensive range of laboratory consumables, ensuring you have the right products on hand for routine testing.

Dry Sample collection swabs

Collect production or environmental samples with confidence.

Glass Fibres

Streamline your suspended solids testing.

Petri Dishes

Our stackable Petri dishes are available in sterile and non-sterile options.

Traditional Microbiological Media

Compliant with global reference methods and industry standards, Neogen™ media and supplements are trusted for reliable bacterial culturing.

Sample-Ready Petrifilm®

These ready-to-use solutions eliminate the need for traditional agar preparation, saving time and resources in your laboratory.

Glassware

Our premium laboratory glassware, crafted from Grade-A borosilicate 3.3 or soda-lime glass offer exceptional durability and precision. The range includes slides, coverslips, flasks, beakers, burettes, and more.

Lab Plastics

From centrifuge tubes and pipette tips to sample bottles, these essentials ensure accurate measurements, contamination-free handling, and reliable results throughout the winemaking process.
