

LITHIUM-ION BATTERY CABINETS

Safety storage cabinets for passive or active storage of lithium-ion batteries

Does this look familiar?

It can happen so easily...

LITHIUM-ION BATTERIES CAN CAUSE A FIRE. CAUSES INCLUDE:

-  MECHANICAL DAMAGE
-  THERMAL OVERLOAD
-  DEEP DISCHARGE
-  ELECTRICAL OVERLOAD

All models of the ION-LINE offer fire resistance for more than 90 minutes when exposed to fire from the inside-out

PROTECTION AND SAFETY

- ▶ 90-minute fire-resistant safety cabinet
