ISO/IEC 17025 SANAS CALIBRATIONS

Lasec® is SANAS-accredited for the calibration of:

- Mass: Micro balances and scales up to 30 kg
- Volume: All brands of micropipettes
- Temperature:
 - Freezers & fridges
 - Autoclaves
 - Waterbaths & incubators
 - Furnaces & ovens

BIOSAFETY CABINET VALIDATIONS

Are your biosafety cabinets protecting you as they should? Lasec® has several NSF 49 accredited engineers, trained in the USA, specialising in Class II Biosafety Cabinet field certification. We prioritise biosafety and regulatory compliance in all our validation work.

PREVENTATIVE MAINTENANCE & SERVICE PLANS

We offer a 'One Stop Shop' to service, calibrate, and validate most laboratory equipment during a single visit.

Benefits of a Service Plan:

- Ensures optimal performance to manufacturer specs
- Minimises downtime
- Avoids costly repairs
- Can be structured into your original purchase or quoted separately

Covered Equipment Includes:

Analytical balances, autoclaves, biological safety cabinets, centrifuges, conductivity meters, freezers (incl. ultralow -80/-86 °C), fridges, incubators (incl. CO₂), laminar flow hoods, microscopes, ovens, PCR cyclers, pH meters, spectrophotometers, water baths, and more

Contact us for a tailor-made plan that suits your lab's needs.

PIPETTE CALIBRATION & SERVICING

Lasec® is SANAS-accredited for pipette calibration.

We service any brand with precision and care.

Services Offered:

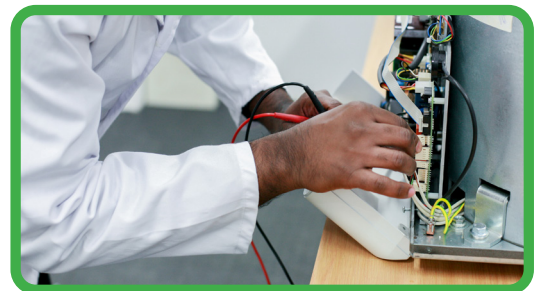

- Free on-site assessment and leak tests in Cape Town and Johannesburg
- SANAS or non-SANAS traceable certificates
- Fast turnaround
- Trade-in options for irreparable pipettes

Regular pipette calibration is essential for reproducible results.

REPAIRS

We service and repair all Lasec®- supplied equipment, using only original manufacturer spare parts.

- Equipment not supplied by Lasec will be assessed based on parts availability
- Strict quality assurance for all repair work

INSTALLATION & TRAINING

Our factory-trained professionals ensure correct installation for accuracy and reliability. We provide hands-on training to your team before equipment use begins.

E&OE.

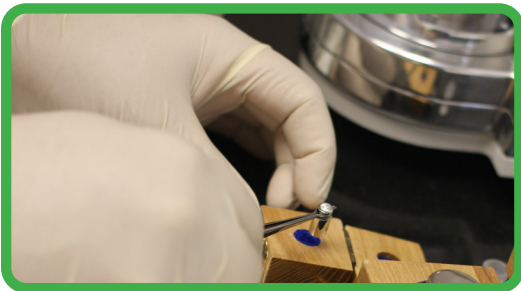

IQ/OQ/PQ Protocol Completion

We have an in-depth understanding of the pharmaceutical industry regarding installation qualification (IQ), operational qualification (OQ), and performance qualification (PQ).

We assist with protocol completion and work closely with regulatory teams and validation officers to ensure full compliance with international or company-specific requirements.

Discover how we can help ensure your production equipment is correctly installed, operates according to requirements, and performs safely.

WHY CHOOSE LASEC® SERVICE?

- We are SANAS-accredited
- We cover all key equipment in your lab
- We offer flexible service plans tailored to your budget
- We prioritise biosafety and compliance
- Our after-sales support is a core part of our customer satisfaction promise
