

World Health Day 2024

Lasec® offers a variety of health and disease burden screening **sample collection kits**. Our **single-use sample collection kits** contain everything required to take a **biological sample**, safely and efficiently from one patient, either with the assistance of a **healthcare professional** or through **self-sample collection**.

Our Kits are tailored to address specific in-field requirements, to easily integrate into laboratory systems and to reduce barriers to screening initiatives.

Sample Collection Kits

- ✓ Self-screening kits are designed to integrate either decentralised or home screening initiatives. These kits are designed around the cornerstones of patient-centric sampling to ensure easy and safe collection.
- ✓ Healthcare worker-assisted sample collection kits are designed for efficient stock management and dissemination. These kits include all required components to take a sample effectively.
- ✓ Sample collection kits are designed to integrate into existing laboratory workflows and can accommodate patient sample traceability.
- ✓ Kit configurations are fully customisable and a variety of branding opportunities are available for our private label kits.

The Lasec® Sample Collection Kit Packing Facility

- ✓ We are ISO13485:2016 certified
- ✓ Our scalable facility and substantial stock can accommodate a variety of kit volume requirements
- ✓ Capacity to manufacture up to 30,000 single-use sample collection kits per day
- ✓ Skilled teams handle a variety of specialised kit configurations which are customised by our customers and end-users

Kit Configurations:

BULK KIT OPTIONS

20 / 50 / 100 single kits packed together to optimise stock management.

These are most suitable for healthcare worker-assisted or community-based sampling initiatives.

PRIVATE LABEL KIT OPTIONS

These are supplied as individual kits (each) in premium packaging. Kit configuration and look and feel are designed in collaboration with customers.

These are suitable for self-, or home-sampling environments and can be made available through retail or online sales platforms.

Screening Focus Areas:

HIV

HIV EID, HIV Viral Load, Drug Resistance

WOMEN'S HEALTH

HPV & STI

FORENSICS

Sexual Assault, DNA Profiling

RESPIRATORY

Tuberculosis, Viral & Bacterial infections

WELLNESS
