

QUANTITATIVE MOLECULAR CONTROLS

ZeptoMetrix[®] quantitative controls are ready-to-use, inactivated full-process controls designed to assess the performance of molecular diagnostic assays. These external quality controls and panels are ideal for assay development, research, and analytical validation.

Why Choose ZeptoMetrix[®] ?

- Compatible with a wide range of molecular testing platforms and assay types
- Offered in multiple formats: single- or multi-analyte
- Validates both extraction and amplification steps
- Supports training and competency monitoring of laboratory personnel
- Ensures quality through evaluation of lot-to-lot consistency of test kits and reagents
